

SALT LAKE NEWS.

John Strand, Bingham miner, aged 50, died yesterday in this city of typhoid fever. He was a native of Finland and had been working at the Highland Boy mine.

Thomas Brocklebank, a miner employed in the Golden Gate, at Mercur, was brought to the Keogh-McKenna hospital suffering with a broken leg, which he received in a fall. The fracture is a simple one.

David Spears, the ten-year-old stepson of J. W. McDaniel, died suddenly yesterday at his home, 136 West South Temple street, of spinal meningitis. The little fellow took sick Wednesday while at school and everything was done for him, but without avail.

Miss Minnie Christensen, who is a resident of Pleasant Grove, and who is employed in the family of Mrs. Sprague, at 360 Center street, left home yesterday afternoon, and had not returned at a late hour last evening. She is a stranger here, to a large extent, and the matter was reported to the police.

Mrs. Dorothea C. Gad Twede, a well-known resident of the Twenty-first ward, where she has lived for the past thirty-five years, died at her home, 120 H. street, yesterday, at the advanced age of 81 years and 7 months. Mrs. Twede was a native of Denmark. She leaves a husband and an adopted daughter, Mrs. A. Mulholland.

The embalmed remains of Geo. Trunnell, aged 22, were received on last midnight's Rio Grande train from Raton, N. M. The deceased was the son of Mrs. Hattie Trunnell of 423 West Second North street, and had been working as a railroad machinist at Leburn, Texas. He only left Salt Lake Friday night last, after a pleasant visit with his mother, to return to his work, and by some mishap fell from the Santa Fe train near Raton.

N. M., sustaining injuries which resulted in his death in a few hours.

W. E. Hubbard, accompanied by his brother Joseph, left yesterday for Pipestone, Minn., the home of the latter, where a sister of the two men is quite ill. W. E. Hubbard expects to be absent about two weeks, but may stay longer. Before leaving, he consulted District Attorney Eichnor as to the probable time of his second trial. Mr. Eichnor consented to Hubbard's leaving, which is taken as an indication that the trial will not be called during the present term of court. Hubbard's bond, furnished some weeks ago, still holds.

An Italian section hand by the name of Luigi Caruso, who is employed on that portion of the Rio Grande western road running between Kyune and Castle Gate, met with a severe accident in Salt Lake last night at about 7:30. In company with another Italian, R. Jachetta, he was driving in a delivery wagon from the Rio Grande Western depot to Jachetta's home, when the horse took fright and ran away, throwing both men out. Jachetta escaped with a few severe bruises, but Caruso was not so fortunate, he sustaining a bad cut over the right eye and a dislocated right shoulder.

A meeting of the representatives of the various Socialistic Democratic camps in the state, was held in the Federated Trades hall, Salt Lake, Wednesday. The purpose of the meeting was to change the name into the Socialistic party and to adopt the platform promulgated by the national Socialistic party convention held in Indianapolis some time ago. Judge C. C. Goodwin was elected temporary chairman and F. M. McQuivey, secretary. The first business of the meeting was the passage of a resolution deploring the assassination of President William McKinley. The temporary organization was made permanent and the Indianapolis platform was adopted. An executive committee of three was elected to carry on the work of the party until a general committee of representatives of the Socialist branches of the party can be selected. The executive committee is composed of A. B. Eoier, Charles Stewart and Peter Johnson, of Murray.

Romance Begun in Hospital.

And now another romance, beginning in a hospital and ending at the altar, has come to light. The principals in the most recent affair were Miss Alice Lucas of Salt Lake, and George Roberts, Jr., of Henefer. They met in March last, when young Roberts underwent an operation at the Keogh-Hosmer hospital and Miss Lucas attended him as nurse. The sequel was a wedding on Wednesday noon at the home of Mr. and Mrs. George Q. Corey, Bishop Whitney officiating. It was a quiet affair witnessed by relatives only, but a reception followed.

A Successful Leaching Process.

Robert Gardiner, president of the American Copper Mining and Extraction company, has returned from Colorado, says a Salt Lake paper, after an absence of several months, during which time he has been engaged in exploiting his process for leaching ores. He has been quite successful in spite of the opposition which met him at the outset. This has been largely removed by persistent efforts on the part of the incorporators of the Denver company which now controls the process. The company has built a 10-ton mill on Eighth avenue and Platte river for experimental purposes and the results obtained warrant Mr. Gardiner in expecting patronage for his process. Just before he left Denver a 28-ton lot of copper ore was treated from Globe, Arizona, which was very satisfactory. The ore carried about 12 per cent copper and a saving of nearly 2,700 pounds of copper was made which was sold for a little over \$360. The extraction cost about 4 1-2 cents for each pound of copper, or about \$125 for treatment for 28 tons. This runs less than \$5 per ton, but Mr. Gardiner says that for high grade ores the cost runs between \$5 and \$6. The cost for low grade ores is lower as the acids in the solution do not expend their energy where there is no mineral.

Mr. Gardiner says his process has won its way into favor among the chemists of Denver because of its success in treating all classes of ores. Even the most refractory copper ores are said to yield to modifications of the process. In the office of Field and Goody, chemists, of Denver, Mr. Gardiner says tests were made at the solicitation of the above named gentlemen in copper carbonates, oxides and sulphates, as well as copper glance, the values were extracted cheaply and quickly. The process consists of the use of sulphuric acid converted to hydrochloric acid by the use of salt. Nitric acid is also used with a powerful oxidizing agent. Silver and gold are also extracted with the copper, though an after process is needed to separate them. Tests have just been made on the copper ores of Farmington canyon with very good success. The tailings seen today were perfectly clean without a trace of copper. A saving of 98 per cent is claimed to have been made on these ores. The process appears to do its work thoroughly and quickly and the expense of operation can be cut down by the use of the solution over and over again—a slight renewal with chemicals only being necessary.

Eminent Divines to Visit Salt Lake.

On Sunday, September 29th, Salt Lake will entertain a train load of eminent Episcopallians, en route to the triennial convention of the Episcopal church of America at San Francisco. Bishop Leonard is making arrangements for their entertainment and also for a public meeting to be addressed by some of the most distinguished members of the party. It is expected that Bishop Gaylor of Tennessee will preach at St. Marks Cathedral in the morning. In the afternoon at 3:30 a mass meeting of children will be held and addresses will be made by Bishop Hare of South Dakota, Bishop Graves of China and Bishop McKim of Japan. In the evening addresses will be made by bishops Potter of New York and Dudley of Kentucky, and probably Bishop Gaylor of Tennessee, Dean Hodges of the divinity school at Cambridge may also speak.

Among other distinguished churchmen in the party are Dr. Jacobs, the Lord Bishop of Newcastle-on-Tyne, Bishop Francis of Indiana, Bishop Nelson of Georgia, and Bishop Horner of North Carolina. A public reception at Rowland Hall Sunday morning is part of the program.
