

A DREAM - VISION : : : 1963 at Azusa, Calif.

I looked and beheld a wide vista, a scene I had never seen before! It was as if I had telescopic vision, and I gazed down, out, and across a very wide yet shallow, bright beautiful Valley. The beauty, wonder, and contented atmosphere was enough to keep one spell-bound. As I gazed closer I became aware of the many, many persons in this Panorama; and that there was a happy and Joyous sound and condition dominating the whole scene. I had not seen nor heard anything so happy and beautiful in this life,,and probably never will!

I was so over-awed that I continued to watch this superb happiness for some time, and as I did so, I became increasingly aware that the happy sound was diminishing and at times a discordant note was swelling to such a volume that it could be distinguished above the happy, pleasant sounds. This startled me so that in scanning further, I saw that beyond the bottom of the valley, and about one third of the way up the opposite slope were many dark patches amid the beautiful light; and upon probing further with my vision, I saw that there were many persons in these dark places. I began to hear their dis-cordant murmerings quite quite plainly. I heard them say: "How long must we remain in this darkness?? Why can we not also be in the Light ?"

I awoke very tired the next morning, and the dream or vision (which ever it was), did not seem too important. About a week later I beheld the same dream again..very beautiful at first, and for a long time. And when I again beheld the unhappy aspect of the dream, it was much more pronounced, The next morning I KNEW what the dream meant, whereas the first time I saw it, it had not too much meaning. Our dear ones who have gone on ahead are awaiting their Eternal recognition !!
