

I heard that Murl is married. I presume it is true. It seems to me she is only a little girl yet. I presume ^{Clarence} will capture a squaw soon, and then Walter will come next.

Richard and Martha are well. Richard will be six in June and will be ready for school next year.

I have been thinking seriously of investing in an Oklahoma farm. From the way that section is improving I believe it would be a safe investment. What do you think? Do you know of a good farm for sale at a bargain near you? About what is the price of land there? Do you think if I invested that Ira would rent it? How have you done since you went there? Do you raise wheat, or what is your main crop? I would not want more than 160 acres, and would not care whether it is improved or not provided it is good salable land. What is your opinion regarding such an investment? Can one get interest on his money from the rent? Hoping to hear from you soon, I am

Fraternally yours,

E. N. Johnson.
