OBJECTIVE
You will be able to:
• read Danish, Swedish, and Norwegian documents at a basic level

A BRIEF HISTORY
Danish, Swedish, and Norwegian are in the Germanic branch of the Indo-European language family. Germanic includes English, Dutch, Frisian, German, Afrikaans, Icelandic and Faeroese. Finnish belongs to a different language family altogether. The Indo-European family includes Russian, Polish, French, Spanish, and number of other languages, mostly found in Europe and a swath that reaches into India.

Here is how to search a webpage for a specific word:
On a PC press the ‘control’ button and hold it down while you press the ‘F’ button. Depending on the browser you use, a box will appear at the top right, left, or bottom left. Type a word or any letter string, i.e. part of a word, into the box. That letter string will then be highlighted. If there is more than one occurrence of that string, such will be indicated and you can click the arrow to find each occurrence.

On a Mac it’s the command and f button at the same time.
